SURLABS

The deployment of AI systems in education is important to promote high-quality digital education and training and to allow all learners and teachers to acquire and share the necessary digital skills and competences, including media literacy, and critical thinking, to take an active part in the economy, society, and in democratic processes.

However, AI systems used in education or vocational training, in particular for

[...]

should be classified as high-risk AI systems

REGULATION (EU) 2024/1689 - ANNEX III

High-risk AI systems referred to in Article 6(2)

SURLABS

3. Education and vocational training:

REGULATION (EU) 2024/1689 - ANNEX III

High-risk AI systems referred to in Article 6(2)

3. Education and vocational training:

- a) AI systems intended to be used to **determine access** or admission or to assign natural persons to educational and vocational training institutions at all levels;

REGULATION (EU) 2024/1689 - ANNEX III

High-risk AI systems referred to in Article 6(2)

3. Education and vocational training:

- a) AI systems intended to be used to **determine access** or admission or to assign natural persons to educational and vocational training institutions at all levels;
- b) AI systems intended to be used to **evaluate learning outcomes**, including when those outcomes are used to steer the learning process of natural persons in educational and vocational training institutions at all levels;

REGULATION (EU) 2024/1689 - ANNEX III

High-risk AI systems referred to in Article 6(2)

3. Education and vocational training:

- a) AI systems intended to be used to **determine access** or admission or to assign natural persons to educational and vocational training institutions at all levels;
- b) AI systems intended to be used to **evaluate learning outcomes**, including when those outcomes are used to steer the learning process of natural persons in educational and vocational training institutions at all levels;
- c) AI systems intended to be used for the purpose of **assessing the appropriate level of education** that an individual will receive or will be able to access, in the context of or within educational and vocational training institutions at all levels;

REGULATION (EU) 2024/1689 - ANNEX III

High-risk AI systems referred to in Article 6(2)

SURLABS

3. Education and vocational training:

- a) AI systems intended to be used to **determine access** or admission or to assign natural persons to educational and vocational training institutions at all levels;
- b) AI systems intended to be used to **evaluate learning outcomes**, including when those outcomes are used to steer the learning process of natural persons in educational and vocational training institutions at all levels;
- c) AI systems intended to be used for the purpose of **assessing the appropriate level of education** that an individual will receive or will be able to access, in the context of or within educational and vocational training institutions at all levels;
- d) AI systems intended to be used for **monitoring and detecting prohibited behaviour of students during tests** in the context of or within educational and vocational training institutions at all levels.

REGULATION (EU) 2024/1689

Recital 56

SURLABS

Since they may determine the educational and professional course of a person's life and therefore may affect that person's ability to secure a livelihood. When improperly designed and used, such systems may be particularly intrusive and may violate the right to education and training as well as the right not to be discriminated against and perpetuate historical patterns of discrimination, for example against women, certain age groups, persons with disabilities, or persons of certain racial or ethnic origins or sexual orientation.

High-risk means prohibited?

SURLABS

NO

High-risk means prohibited?

SURLABS

High-risk AI Systems Requirements

SURLABS

- Risk management system (iterative process)
- Data governance for training AI Systems
- Technical documentation - prior to release
- Record-keeping (logging)
- Transparency - Provide information public
- Human Oversight
- Accuracy, Robustness, Cibersecurity
- Notifying authorities
- Registration - prior to release

REGULATION (EU) 2024/1689

Timeline

13.03.2024 - Officially announced

13.06.2024 - Officially Published (Transitional period)

08.2025 - National Regulations Deadline (Transitional period)

08.2026 - Mandatory in all European Union countries

REGULATION (EU) 2024/1689

Previous provision 56

SURLABS

DON'T PANIC

Currently available tools

AIChat for ILIAS and Moodle

SURLABS

- Allows users to chat with an LLM
- Publicly available: GPT
- Internal testing: LLaMa, Claude
- Next feature: Image generation
- Improvements option: Different models for different purposes

Future tools

Feedback / Options generation

SURLABS

- Simplify question creation process
- Improves quality of questions with one click.

High-risk systems

SURLABS

- Adaptive learning
- Ensure integrity on Student' tasks
